PROFESSIONAL SUMMARY

Computer Science student with a strong interest in cybersecurity and a practical, efficiency-first approach to problem-solving. Experienced in designing and benchmarking complex data-driven systems, from custom data structures to inverted indexes. Seeking a cybersecurity internship to apply technical skills in a professional, collaborative environment.

EDUCATION

The University of Texas at Dallas Richardson, TX

Bachelor of Science, Computer Science. *Expected May 2028*

Relevant Coursework: Data Structures and Algorithms, Computer Architecture, Systems Programming

CERTIFICATIONS

- CompTIA Security+, September 2026

SKILLS

Operating Systems: Linux, UNIX, Windows

Programming Languages: C, C++, C#, Java, Python, Assembly, HTML, CSS

Tools: Bash, VS Code, MS Office, Git, GitHub

Languages: English, Portuguese

ACTIVITIES & LEADERSHIP

Cyber Defense and Response Unit August 2025 – May 2026

Member

Computer Security Group August 2024 – May 2025

Member

EXPERIENCE

Ride Attendant / Lifeguard June 2026 – August 2026

Schlitterbahn *Galveston, TX*

- Operated water attractions efficiently while maintaining strict safety procedures and ensuring a positive guest experience.
- Assisted guests with questions, directions, ride procedures, and general park needs.
- Monitored pools and ride areas for signs of distress, injury, or drowning and responded quickly to emergencies.
- Performed water rescues and provided first aid when necessary, prioritizing guest safety.

PROJECTS

In-Memory Document Search Engine January 2026 – May 2026

Java

- Designed a multi-index document store with a custom circular buffer, TreeMap, and hash-based inverted index, enabling O(1) average-case term lookup and O(log n) prefix/range queries.
- Implemented multi-term AND search using a size-ordered set-intersection strategy to minimize computation on large posting lists.
- Benchmarked performance across 10K–100K document datasets, achieving ~1.5µs average term search latency and validating theoretical complexity against measured results.
- Maintained consistency across four synchronized data structures through all insert/delete operations.

Personal Portfolio Website | https://tytaniumg.github.io/ October 2026

HTML • CSS • Git • GitHub Pages

- Designed and built a responsive portfolio site from scratch with semantic HTML5 and CSS (Flexbox, custom properties), tested on desktop and mobile screen sizes.
- Added accessibility features, including descriptive aria-label text on icon links and keyboard-focus styling on interactive elements.
- Deployed with GitHub Pages using Git version control and update it through commits and pushes.
